#### **TECHNICAL PROJECTS**

Client Reporting & Analytics – Data Engineering on Health Insurance Industry

• The data pipeline is created to ensure seamless experience for one of the leading healthcare industries in North America for their client reporting and analytics. The Data pipeline is created with the help of Databricks Lakehouse and reporting is done on Snowflake

Derive Insights for Campaign – Develop AWS Well Architected Solution for deriving insights on Client Account Marketing

An AWS Well Architected solution is designed and developed that enables the business stakeholders to derive insights on the
potentials client and prospects for the health services industry. The design involves S3, Glue, Lambda & Teradata to drive
business value

**Vehicle Data Analysis** – Data Analysis on vehicle data [GitHub][PPT]

- This project is developed as an own project in order to get good level of Data Engineering under the hood
- The data analysis is performed on the public vehicle data using API calls and storing the response of the API is then processed with the help of Apache Spark and loaded into the MySQL tables for further reporting and analysis. Further, the data pipelines are scheduled using Apache Airflow

#### **INTERNSHIP EXPERIENCE**

Software Labs, Mumbai – [September 2020 to December 2020]

• Interned as a Backend Engineer where the API Responses are scripted to have an asynchronous API call and fetch the results which is used for deriving insights

## **POSITION OF RESPONSIBILITY**

Junior Cloud Data Engineer – Accenture [November 2021 to January 2023]

• Onboarded as a Junior Cloud Engineer to design, develop and maintain AWS Solution for clients that helps them attract the potential clients to their Healthcare industry

Data Engineer – Accenture [January 2023 to Present]

• Onboarded as Data Engineer who helps in designing the client reporting products that facilitates business stakeholder to generate reports and insights in a seamless manner using modern cloud data platforms like Databricks & Snowflake

## **CERTIFICATIONS AND ACHIEVEMENTS**

- Earned Gold Badge in Python & SQL in Hackerrank
- AWS Certified Cloud Practitioner
- Databricks Certified Data Engineer Associate

## **TECHNICAL PROFICIENCY**

- Languages: Python
- Database/Data Warehouse: Teradata & MySQL
- Frameworks: Hadoop, Apache Spark & Apache Hive
- Cloud Computing: Amazon Web Services (AWS)
- Cloud Data Platforms: Databricks & Snowflake
